

Cycle Grades Tour E-bike

Our e-bike tours are specially designed for recreational cyclists who enjoy discovering the region at a relaxed pace. These tours focus on enjoying the landscape, cultural heritage, and history of the area.

Thanks to electric assistance, these routes are accessible to almost everyone with a basic level of fitness. However, it's important to note that we divide the tours into three difficulty levels, based on distance and elevation gain.

While the e-bike takes much of the physical effort out of cycling, longer distances or greater elevation can still make for a more challenging ride.

To participate in these cycling holidays, it's important that you have a good basic fitness level, cycle regularly, and are comfortable shifting gears efficiently when climbing or descending — this will greatly enhance your enjoyment on the road.

Below is a simple breakdown of the three difficulty levels, so you can choose a route that suits your experience and fitness level.

Difficulty Levels

Level 1

- Distance: Around 45 km
- Elevation gain: Minimal
- Terrain: Flat to gently rolling
- Requirements: No specific experience needed

Level 2

- Distance: 35–60 km
- Elevation gain: Approximately 800 metres
- Terrain: Gently rolling to moderate climbs, with occasional steep sections
- Requirements: Regular cyclist, comfortable using an e-bike

Level 3

- Distance: 60+ km
- Elevation gain: 1,000+ metres
- Terrain: Hilly to mountainous, with longer descents
- Requirements: Good fitness, experience with longer rides, and confident gear shifting is important
